## Erection of the Linde Air Separation Unit Galati

To whom it may concern,  
we hereby confirm that SC CRIOMECSA Galati has performed as contractor for Linde Gaz Romania for the erection of the Air Separation Unit in the Arcelor Mittal steelworks in Galati under supervision of Linde Engineering.

Criomec was awarded with the general contract including the scope for

- Piping
- Erection and installation of all equipment
- Assembly of the booster compressor under supervision of manufacturer Atlas Copco
- Parts of the electrical and instrumentation work
- Scaffolding
- Painting and insulation
- Commissioning work

The scope, partly handled by subcontractors, was successfully executed and finalized in schedule. Linde's quality requirements according to Linde Standard were fully met. The Linde safety regulations were obeyed resulting in a zero accidents during the project duration. The professional management of the project contributed to the successful result of the erection work. Commercial and contractual aspects were handled in a fair and trustworthy atmosphere. We can fully recommend the cooperation with CRIOMECSA as an experienced partner for the erection of Air Separation Units.

Kind regards,

Dr.-Ing. Dirk Grosserichter
